CONTACTS! v3 *Now includes HTML Email facility*

A simple yet powerful way to manage your contacts.

Fully customisable. Use it as it is, integrate it with your existing systems or customise it to suit your needs, either by yourself, your preferred developer or with Cruse Control.

Help screens give onscreen advice from within the database to help you get up and running quickly.

All information is searchable and reportable.

User definable categories enable marketing information to be tracked and stored.

Keep records of all Letters, Emails, Faxes and Phone calls, and even do mail merges!

Email from the database.

Notes pages are searchable too.

**Schedule/Diary facility - view your appointments/phone calls etc by
day/week/month.**

**Meeting Maker - invite others to a meeting, email them direct from the
Database, and they can confirm their attendance too.**

Direct links to web sites - store multiple web sites for any company and open these directly from the database.

**In addition to the "mail merge to letters" facility there is also a 'mail
merge to emails' facility, allowing you to create individual emails to selected groups in your database. A record of each email or letter is
kept with the individual contact details so you can see who has received which mailing.**
Link any document (pdf, word etc) to a contact on the system for quick reference.

New features of v3 are as follows:

Fresh new interface design featuring clearer screens.

Fully FileMaker Pro 7 compliant.

View all correspondence by Company as well as by Individual

Company categories in addition to Individual categories for more accurate searches.

Choose how you send your emails:

Out of the database using your desktop email software, with or without an attachment.

Directly out of the database with or without an attachment, plain text.

Directly out of the database as HTML emails with attachment.

Additionally, you can now choose to email directly into the database and file incoming emails automatically including auto file attachments and open them from the individuals record. Even when using this feature, your desktop email software can still be used.

Numerous other enhancements and navigation improvements as well as the ability to use the new features of FileMaker Pro 7 when using, or customising, the database.

Costs: Costs are £299 + VAT including a copy of FileMaker Pro 7, £179 + VAT without a copy of FileMaker Pro.
Discounts for Multiple licenses.
To order a full copy, multiple copies, a site licence or for further information, visit http://www.crusecontrol.com or email contacts@crusecontrol.com.

System Requirements: As FileMaker Pro 7 (and FileMaker Server 7 if networking to more than 3 users)

Windows
Pentium 300 MHz or higher
64MB of RAM for Windows 2000
128MB of RAM for Windows XP
CD-ROM drive and hard disk drive
Windows 2000 (Service Pack 4), Windows XP (Service Pack 1)*

Macintosh
Apple G3 or higher (no G3 upgrade cards)
128MB of RAM
CD-ROM drive and hard disk drive
Mac OS X v10.2.8 or later**

For All Platforms
Networking: TCP/IP (FileMaker Pro 7 can act as an host for up to five
concurrent FileMaker Pro 7 users. See FileMaker Server 7 for increased
capacity.)
Instant Web Publishing: A host computer with continuous access to
theInternet or intranet via TCP/IP (FileMaker Pro 7 can manage up to five
concurrent Instant Web Publishing sessions. See FileMaker Server 7
Advanced for increased capacity.)
Access to the Internet requires an Internet service provider, FileMaker does
not provide an Internet account for you
Limited to five concurrent web sessions

If using CONTACTS! v3 in a multi user networked environment, FileMaker
Server 7 requires the following:

Windows
Windows 2003 Server Standard Edition
Windows 2000 Server (Service Pack 4 installed)
